北斗星通旗下企业

Microwave dielectric ceramic materials, component,
terminal, full domain chain integrator

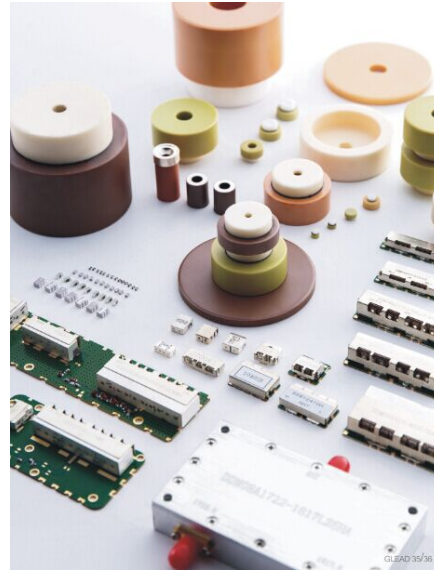

Main Products

Basis material

- LTCC material and raw tile
- HTCC material
- NFC sintered ferrite sheets
- Surface acoustic wave package substrate
- Rf module substrate
- High frequency copper clad sheet

Rf passive components serialization products

- LTCC frequency devices
- Microwave dielectric element

Antenna serialization products

- Passive antenna
- Active antenna
- Communications antenna
- Antennas are used in special industries

Modules and terminals serialized products

- The navigation module,
- The bluetooth module
- WiFi module
- NB - IoT module
- Data acquisition and transmission module for industrial equipment
- CATV products

Applications

应用领域

Application Field:
Satellite communications
Wireless communication
Wired network
Automotive electronics
Aeronautics and Astronautics
